

Mobileye's 'Under the Hood' (Replay)

January 6, 2022

During CES 2022, Mobileye CEO Prof. Amnon Shashua offers an update on how the company will deliver economically viable consumer autonomous vehicles.

On Jan. 5, Mobileye CEO Prof. Amnon Shashua explained how the company will deliver economically viable consumer autonomous vehicles (AV) to the world. He unveiled new chip technology, shared progress on radar and lidar technology, and, for the first time, disclosed details about Mobileye's approach to enabling fully autonomous solutions across vehicle types and use cases around the globe. During the 2022 "Under the Hood" session, Shashua showed how Mobileye is rewriting the AV playbook.
